

Alabama Department of Mental Health Block Grant Intervention Work Plans for Underage Drinking and Prescription Drug Misuse

The documents included in this file folder are the twenty-eight prevention interventions that have been included in the Prevention Planning Template for consideration for implementation by AL Department of Mental Health Block Grant subrecipients. The Intervention Work Plan Templates are designed to assist subrecipients in the implementation of their selected interventions. These Intervention Work Plan Templates should be included in your online Prevention Plan Template found in Step 4 following Q41, Q71, and Q100.

The Intervention Work Plans include key implementation activities for each intervention and ask the subrecipients to identify person(s) accountable for implementing and key partners who will assist. At the bottom of the Intervention Work Plans are links to Resources such as program websites and available guidance on implementation. Please note that some URL links listed under Resources may require you to copy and paste the URL into your web browser.

Subrecipients are encouraged to adapt the Intervention Work Plans to meet the needs of the communities and counties you serve by modifying or adding key activities. You can cut and paste from these Work Plan steps or directly type these steps into your online PPT. If you are implementing an intervention that is not included in these twenty eight interventions, please consult your Prevention Consultant and please use the blank "Other Work Plan" Template to develop your own Intervention Work Plan implementation steps.

The Intervention Work Plans will be used by the ADMHSAS to track progress through the Block Grant year as well as identify areas for technical assistance. Please save an electronic copy of each Word version of your completed Intervention Work Plans for your own records. If you have any trouble opening the Intervention Work Plan zip file please see the file "Opening a Zip File- Intervention Work Plans".
