INTRODUCTION

INTRODUCTION

This document is the Contract Billing Manual and is intended to function as a companion to the ADMH Substance Use Services purchase of service contract. It serves to define billable services, eligible staff (where appropriate), reporting codes, units, unit rates, restrictions (if any), and any other condition of billing the service.

While it is recognized that involvement of family members in the rehabilitation of recipients with mental health and substance use disorders may be necessary and appropriate, provision of services where the family is involved must be clearly directed to meeting the identified recipient's needs. Services provided to non-Medicaid eligible family members independent of meeting the identified recipient's needs are not covered by Medicaid.

Questions relative to this manual should be directed to the appropriate Office of Substance Use Treatment Services team member.

No residential programs with 17 beds or more are eligible to bill Medicaid (IMD Exclusion).

Listing of modifier codes:

59 – Special Medicaid Modifier (NCCI)

AM - Buprenorphine

CG – Probation (methadone)

DY – Department of Youth Services

EF-Education Funds

GZ – Bed Hold Day

H9 – Drug Court

HA – Adolescent

HD – Special Women's

HF – Substance Use

HG – Methadone

HH – Co-occurring Enhanced

In disaster situations where recipients must be sent away from the facility for a brief time, this service can be billed for up to three (3) days. Billing more than three (3) days must be approved by the ADMH Office of Substance Use Treatment Services.

Location: Level 3.01, 3.1, Level 3.3, Level 3.5, Level 3.7-WM certified residential programs

RESIDENTIAL BED HOLD DAY

Definition: Bed Hold is defined for the Residential Treatment Programs Contract Billing as the act of reserving a bed space for a recipient that is admitted to the facility but must be temporarily absent from the program. Absence is defined as time away from the program due to illness that results in a (psychiatric or general) hospital stay, family illness/emergency, weather-related disasters, temporary incarceration, or physical damage resulting in loss of power or water to the facility. All other conditions must comply with the general rules for bed occupancy. The Residential Bed Hold Day Policy is applicable to all residential levels of care.

Billing Restriction: Bed space for admitted recipients is approved for payment for up to four (4) bed days without approval from the ADMH Office of Substance use disorder treatment Services. The contractor will submit on a timely basis to MHSAS the appropriate request for approval of additional days past the four (4) day time limit for the signature and approval of the appropriate staff member. Requests for approval may be made by fax or e-mail before services are entered into the Alabama Substance Abuse Information System (ASAIS) for payment.

Required/Eligible Staff: Program and/or clinical directors as defined in the current version of the SA Administrative Code.

ADMH Reporting Code: Add the GZ modifier to any bundled residential code or Behavioral Health Accommodation code (i.e. H0018:HF:GZ, H0019:HF:GZ, H2036:HF:GZ, etc.).

SAS Reporting Unit: 1 Bed Day

SAS Contract Billing Rate: \$45.00 Adult
\$60.00 Co-Occurring Enhanced, Adolescent and Special Women's

Documentation Requirements: Written notification in the recipient record will be necessary whenever a recipient is absent from the program for more than a 24-hour period. Documentation should cover the reason for the recipient's absence and note that the program is utilizing the Bed Day Policy. On occasions when the recipient will be absent from the program for more than the four (4) days allowed by this policy, written documentation of the reason(s) for the absence, along with the approval from the ADMH Office of Substance Use Services, must be included in the recipient's record.

Maximum Billing Unit(s): 4 Bed Days (96 hours) Without State Approval

SAS Reporting Combination Restrictions: Must be actively enrolled in an ADMH certified substance use disorder treatment program. Cannot be billed in conjunction with another residential rate (MH, SA or DD).

Location: Only appropriate for residential settings.

BUNDLED

SERVICES

HOSPITAL DETOXIFICATION

Definition: An organized service delivered by medical and nursing professionals, which provides 24-hour medically supervised evaluation and withdrawal management in a permanent facility with inpatient beds for individuals who have opioid use disorders, alcohol use disorders or sedative, hypnotic, or anxiolytic use disorder. Services are delivered under a defined set of physician approved policies and physician monitored procedures or clinical protocols. This level provides care to recipients whose withdrawal signs and symptoms are, or historically have been, sufficiently severe to require 24-hour inpatient care with observation, monitoring and treatment being available. If a SOR modifier is used for opioid use disorders, a transition plan from detoxification to treatment must be implemented and include the use of extended release naltrexone.

Essential to this level of care is the availability of appropriately credentialed and licensed nurses who monitor recipients over a period of several hours each day of service.

Eligible Staff: See ADMH Administrative Code.

SAS Reporting Code: **H0009:HF – Adult**
H0009:HF:HD – Special Women’s
H0009:HF:HH – Co-Occurring
H0009:HF:HZ-Indigent
H0009:HF:H9-Drug Court

SAS Reporting Unit: 1 day

SAS Contract Billing Rate: \$425.00/Unit/state funding only as a line item in agency contract

Maximum Billable Unit(s): 1 per day; 15 days per episode without prior approval from ADMH

SAS Reporting Combination Restrictions: Cannot be billed in conjunction with a bundled/residential rate (MH, SA or DD). May only be billed for individuals with a diagnosis of opioid use disorder, alcohol use disorder or sedative, hypnotic, or anxiolytic use disorder.

Location: Services can be delivered in an ADMH approved hospital setting only. It must afford an adequate therapeutic environment, and that protects the recipient's rights to privacy and confidentiality.

**LEVEL 1:WM AMBULATORY WITHDRAWAL MANAGEMENT WITHOUT EXTENDED
ON-SITE MONITORING**

Definition: Level I-WM is an organized outpatient service, delivered by trained clinicians who provide medically supervised assessment, medication or non-medication methods of withdrawal management, recipient education, non-pharmacological clinical support, involvement of family members or significant others in the withdrawal management process, and discharge or transfer planning, including referral for counseling and involvement in community recovery support groups for those individuals with a diagnosed opioid use disorder, alcohol use disorder or sedative, hypnotic, or anxiolytic use disorder. Therapies also include physician and/or nurse monitoring, assessment, and management of signs and symptoms of intoxication and withdrawal

Eligible Staff: See ADMH Administrative Code.

SAS Reporting Codes: **H0014:HF, HF:H9, or HF:HZ - Adult**
H0014:HF:HD – Special Women’s
H0014:HF:HH – Co-occurring

SAS Reporting Unit: 1 day

SAS Contract Billing Rate: \$45.00 Adult
\$54.00 Co-occurring Enhanced or Special Women’s

SAS Reporting Combination Restrictions: Must be actively enrolled in an ADMH certified substance use disorder treatment program. Cannot be billed in conjunction with a bundled/residential rate (MH, SA or DD).

Maximum Billable Unit(s): 1 per day

Location: Services can be delivered in any setting that is acceptable for both the recipient and staff member, that affords an adequate therapeutic environment, and that protects the recipient's rights to privacy and confidentiality.

LEVEL 2.5: PARTIAL HOSPITALIZATION SERVICES

Definition: Partial hospitalization programs generally feature 20 or more hours of clinically intensive programming per week, as well as daily or near-daily contact, as specified in the recipient's treatment plan. These programs typically have direct access to or close referral relationship with psychiatric, medical and lab services.

Eligible Staff: See ADMH Administrative Code.

SAS Reporting Code: **H0035:HF, HF:H9, or HF:HZ - Adult**
H0035:HF:HD – Special Women's
H0035: HF:HH – Co-Occurring Enhanced

SAS Reporting Unit: Hour

SAS Contract Billing Rate: \$16.25 Adult
\$19.50 Co-occurring Enhanced and Special Women's

Maximum Billable Unit(s): 4 units per day/520 units per year

SAS Reporting Combination Restrictions: Must be actively enrolled in an ADMH certified substance use disorder treatment program. Cannot be billed in conjunction with a bundled/residential rate (MH, SA or DD). These restrictions apply while a recipient is attending/actively enrolled in Partial Hospitalization whether the restricted services occur on the same day as Partial Hospitalization.

Location: Services can be delivered in any setting that is acceptable for both the recipient and staff member, that affords an adequate therapeutic environment, and that protects the recipient's rights to privacy and confidentiality.

LEVEL 2 WM: AMBULATORY WITHDRAWAL MANAGEMENT WITH EXTENDED ON-SITE MONITORING

Definition: Level 2WM detoxification is an organized outpatient service, which may be delivered by medical and nursing professionals who provide medically supervised evaluation, detoxification and referral services for those individuals with a diagnosed opioid use disorder, alcohol use disorder or sedative, hypnotic, or anxiolytic use disorder. Outpatient withdrawal management services shall be designed to treat the recipient's level of clinical severity and to achieve safe and comfortable withdrawal from mood-altering substances, as well as effectively facilitate the recipient's entry into ongoing treatment and recovery. If SOR modifier is used, transition plan must include the use of extended release naltrexone.

Essential to this level of care is the availability of appropriately credentialed and licensed nurses who monitor recipients over a period of several hours each day of service.

A detailed description of the services typically offered in this level of care, the care setting and how to identify which recipients would benefit best from these services based on an ASAM dimensional needs assessment, is described in the most recent publication of the ASAM criteria.

Eligible Staff: See ADMH Administrative Code.

SAS Reporting Code: **H0013:HF, HF:H9, HF:HZ - Adult**
H0013:HF:HH – Co-Occurring Enhanced
H0013:HF:HD – Special Women’s

SAS Reporting Unit: 1 day

SAS Contract Billing Rate: \$145.00 Adult
\$174.00 Co-Occurring Enhanced or Special Women’s

Maximum Billable Unit(s): 1 per day

SAS Reporting Combination Restrictions: Must be actively enrolled in an ADMH certified substance use disorder treatment program. Cannot be billed in conjunction with a bundled/residential rate (MH, SA or DD).

Location: Services can be delivered in any setting that is acceptable for both the recipient and staff member, that affords an adequate therapeutic environment, and that protects the recipient's rights to privacy and confidentiality.

LEVEL 3.01: TRANSITIONAL RESIDENTIAL TREATMENT

Definition: A residential service that provides substance use disorder supportive services and therapeutic activities conducted in a residential setting designed to provide an environment conducive to recovery and to promote reintegration into the mainstream of society.

Eligible Staff: See ADMH Administrative Code.

SAS Reporting Code: **T2048:HF, HF:H9, HF:S3, or HF:HZ - Adult**
T2048:HF:HD – Special Women’s
T2048:HF:HH – Co-Occurring Enhanced

SAS Reporting Unit: Day

SAS Contract Billing Rate: \$40.00 per day Adult
\$48.00 per day Co-Occurring Enhanced and Special Women’s

Maximum Billable Unit(s): The maximum units billable in one day cannot exceed the number of certified beds.

SAS Reporting Combination Restrictions: Must be actively enrolled in a 3.01 ADMH certified substance use disorder treatment program. Cannot be billed in conjunction with another bundled/residential rate (MH, SA or DD).

Location: In a residential structure that complies with all applicable federal, state, and local codes.

LEVEL 3.1: CLINICALLY MANAGED LOW INTENSITY RESIDENTIAL TREATMENT ADULT

Definition: Program offers at least 5 hours per week of low intensity treatment of substance use disorders. Treatment is characterized by services such as individual, group, and family therapy; medication management; and psychoeducation. These services facilitate the application of recovery skills, relapse prevention, and emotional coping strategies. They promote personal responsibility and reintegration of the recipient into the network systems of work, education, and family life. Mutual/self-help meetings are available on-site, or easily accessible in the local community.

A detailed description of the services typically offered in this level of care, the care setting and how to identify which recipients would benefit best from these services based on an ASAM dimensional needs assessment, is described in the most recent publication of the ASAM Criteria.

Eligible Staff: See ADMH Administrative Code.

SAS Reporting Code: **H2034:HF, HF:H9, HF:S3, or HF:HZ-Adult**
H2034:HF:HD – Special Women’s
H2034:HF:HH – Co-Occurring Enhanced

SAS Reporting Unit: Day

SAS Contract Billing Rate: \$54.00 Adult
\$65.00 Co-occurring Enhanced and Special Women’s

Maximum Billable Unit(s): The maximum units billable in one day cannot exceed the number of certified beds.

SAS Reporting Combination Restrictions: Must be actively enrolled in an ADMH certified substance use disorder treatment program. Cannot be billed in conjunction with a bundled/residential rate (MH, SA or DD).

Location: In a residential structure that complies with all applicable federal, state, and local codes.

**LEVEL 3.3: CLINICALLY MANAGED POPULATION-SPECIFIC HIGH INTENSITY ADULT
RESIDENTIAL TREATMENT**

Definition: Provide a structured recovery environment in combination with high intensity clinical services provided in a manner to meet the functional limitations of recipients to support recovery from substance-related disorders. For the typical recipient in a Level 3.3 program, the effects of the substance use or other addictive disorder or a co-occurring disorder resulting in cognitive impairment on the individual’s life are so significant, and the resulting level of impairment so great, that outpatient motivational and/or relapse prevention strategies are not feasible or effective. Similarly, the recipient’s cognitive limitations make it unlikely that he or she could benefit from other levels of residential care. The functional limitations seen in individuals who are appropriately placed in Level 3.3 are primarily cognitive and can be either temporary or permanent. When assessment indicates that such an individual is no longer cognitively impaired, he or she can be transferred to a higher or lower level of care based upon the severity of illness and rehabilitative needs.

A detailed description of the services typically offered in this level of care, the care setting and how to identify which recipients would benefit best from these services based on an ASAM dimensional needs assessment, is described in the most recent publication of the ASAM criteria.

Location: In a residential structure that complies with all applicable federal, state, and local codes.

LEVEL 3.5: CLINICALLY MANAGED HIGH INTENSITY RESIDENTIAL TREATMENT - ADULTS

LEVEL 3.5: CLINICALLY MANAGED MEDIUM INTENSITY RESIDENTIAL TREATMENT - ADOLESCENTS

Definition: Programs are designed to serve recipients who, because of specific functional limitations, need safe and stable living environments to develop and/or demonstrate sufficient recovery skills so that they do not immediately relapse or continue to use in an imminently dangerous manner upon transfer to a less intensive level of care. This level assists recipients whose addiction is currently so out of control that they need a 24-hour supportive treatment environment to initiate or continue a recovery process that has failed to progress. Their multidimensional needs are of such severity that they cannot safely be treated in less intensive levels of care. Many recipients treated in this level have significant social and psychological problems.

A detailed description of the services typically offered in this level of care, the care setting and how to identify which recipients would benefit best from these services based on an ASAM dimensional needs assessment, is described in the most recent publication of the ASAM criteria.

LEVEL 3.7: MEDICALLY MONITORED INTENSIVE INPATIENT TREATMENT - ADULTS

LEVEL 3.7: MEDICALLY MONITORED HIGH-INTENSITY INPATIENT TREATMENT - ADOLESCENTS

Definition: Programs provide a planned and structured regime of 24-hour professionally directed evaluation, observation, medical monitoring and addiction treatment in an inpatient setting. This level of care is appropriate for those recipients whose sub-acute, biomedical and emotional, behavioral or cognitive problems are so severe that they require inpatient treatment, but who do not need the full resources of an acute care general hospital or a medically managed inpatient treatment program.

A detailed description of the services typically offered in this level of care, the care setting and how to identify which recipients would benefit best from these services based on an ASAM dimensional needs assessment, is described in the most recent publication of the ASAM criteria.

Location: In a residential structure that complies with all applicable federal, state, and local codes.

LEVEL 3.7-WM MEDICALLY MONITORED INPATIENT WITHDRAWAL MANAGEMENT

Definition: Level 3.7-WM is an organized service delivered by medical and nursing professionals, which provides 24-hour medically supervised evaluation and withdrawal management in a permanent facility with inpatient beds for those individuals with a diagnosed opioid use disorder, alcohol use disorder or sedative, hypnotic, or anxiolytic use disorder. Services are delivered under a defined set of physician-approved policies and physician-monitored procedures or clinical protocols. This level provides care to recipients whose withdrawal signs and symptoms are sufficiently severe to require 24-hour inpatient care with observation, monitoring and treatment being available. If SOR modifier is used, transition plan must include the use of extended release naltrexone.

A detailed description of the services typically offered in this level of care, the care setting and how to identify which recipients would benefit best from these services based on an ASAM dimensional needs assessment, is described in the most recent publication of the ASAM criteria.

Eligible Staff: See ADMH Administrative Code.

SAS Reporting Code: **H0011:HF, HF:GZ, HF:HZ, HF:H9, HF:HD, HF:HH or HF:HZ – Adult**

SAS Reporting Unit: 1 day

SAS Contract Billing Rate: Determined per agency

SAS Reporting Combination Restrictions: Must be actively enrolled in an ADMH certified substance use disorder treatment program. Cannot be billed in conjunction with a bundled/residential rate (MH, SA or DD).

Maximum Billable Unit(s): Maximum of 15 days per episode; ADMH approval required for episodes lasting longer than 15 days. May only be billed for individuals with a diagnosis of opioid use disorder, alcohol use disorder or sedative, hypnotic, or anxiolytic use disorder.

Location: In a residential structure that complies with all applicable federal, state, and local codes.

Opioid Use Disorder Treatment

Definition: For the purposes of this definition and billing code, the medications referenced are methadone and buprenorphine. Opioid Use Disorder Treatment is defined as the administration of medication to recipients who have a diagnosed opioid use disorder. Medication is administered to support the recipient's efforts to restore adequate functioning in major life areas that have been debilitated because of opioid addiction. This service includes medication administration and concurrent related medical and clinical services. Treatment with the use of methadone or buprenorphine is designed to offer the recipient an opportunity to effect constructive changes in his/her life through the provision of medication assistance in conjunction with counseling and medical services.

Eligible Staff: See ADMH Administrative Code.

Eligible Provider Type for Administration of Medication: Physician, Physician's Assistant, CRNP, RN, LPN

SAS Reporting Code: H0020:HF, HF:HD, HF:HG, HF:HH, HF:HD:HG, HF:HH:HG, HF:HG:V1, HF:HG:UF, HF:HG:V3, HF:HG:CG, HF:HG:TS, HF:S3, HF:HD:S3, HF:HH:S3, HF:HZ:S3, HF:H9:S3 -Methadone
H0020:HF:AM, HF:AM:S3-Buprenorphine products (oral only)

SAS Reporting Unit: Day

SAS Contract Maximum Billing Rate: \$17.34 per day for methadone
\$27.54 per day for buprenorphine

Maximum Billable Unit(s): 1 per day

SAS Reporting Combination Restrictions: Must be actively enrolled in an ADMH and SAMHSA certified opioid treatment program. May only be billed by a certified opioid treatment program (OTP).

Location: Services can be delivered in any setting that is acceptable for both the recipient and staff member, that affords an adequate therapeutic environment, and that protects the recipient's rights to privacy and confidentiality. Location and services should follow all applicable federal, state, and local codes.

Location: Services can be delivered in any setting that is acceptable for both the recipient and staff member, that affords an adequate therapeutic environment, and that protects the recipient's rights to privacy and confidentiality.

BEHAVIORAL HEALTH OUTREACH SERVICE

Definition: Behavioral health outreach services are a planned approach to reach a targeted population. Contracted providers must use outreach models that are scientifically sound. Federal regulations identify three examples of scientifically sound models that may be used. They are:

1. The Standard Intervention Model
2. The Health Education Model
3. The Indigenous Leader Model

No one model fits all communities or all situations. If none of the models listed above are applicable to the local situation, the contracted provider may use an approach which reasonably can be expected to be effective and which has been approved, in writing, by ADMH. When other models are used, the providers must show how, within that community, the chosen model has the expectation to be effective.

As outreach demonstrates an agency's willingness to go to the community rather than the community coming to it, providers must ensure that their outreach efforts:

- a. Consist of contracting, communicating with, and following up with high-risk substance users, their associates, and the neighborhood residents.
- b. Adhere to federal and state confidentiality requirements.
- c. Promote awareness about the relationship between injecting drug use and communicable diseases.
- d. Recommend steps that can be taken to prevent HIV transmission.
- e. Address the selection, training, and supervision of their outreach workers.
- f. Encourage recipient entry into treatment.

This service is not billed per recipient, it is billed (like prevention) on a "dummy" recipient that indicates services to unknown recipients.

Eligible Staff: May be conducted by staff who meets the qualifications for QSAP I, QSAP II, QSAP III, Qualified Paraprofessional, or Certified Recovery Support Specialist (CRSS).

CASE MANAGEMENT

Definition: A case manager assists a recipient in identifying the recipient's goals, strengths and needs; plans with the recipient what services and community resources might help the recipient to accomplish the recipient's goals; helps refer (and often accompanies) the recipient to obtain services and resources; and then monitors and coordinates the services and resources received to assure that the recipient is getting the help needed to accomplish the recipient's goals and to address the recipient's needs.

These are the four service components to services that case managers provide to their recipients:

- Assessment
- Planning
- Referral and linkage
- Monitoring and coordination.

ASSESSMENT: Comprehensive assessment and periodic reassessment of recipient needs, to determine the need for any medical, educational, social or other services. These assessment activities include:

- taking recipient history;
- identifying the recipient's needs and completing related documentation; and
- gathering information from other sources such as family members, medical providers, social workers, and educators (if necessary), to form a complete assessment of the eligible recipient.

Reassessment/follow-up – The case manager shall evaluate, at intervals of six months or less, through interviews and observations, the progress of the recipient toward accomplishing the goals listed in the case plan. In addition, the persons and/or agencies providing services to the recipient will be contacted and the results of these contacts, together with the changes in need shown in the reassessments, will be utilized to accomplish any needed revisions to the case plan.

PLANNING: Development (and periodic revision) of a specific case plan, that is based on the information collected through the assessment, that:

- specifies the goals and actions to address the medical, social, educational, and other services needed by the recipient;
- includes activities such as ensuring the active participation of the eligible recipient, and working with the recipient (or the recipient's authorized health care decision maker) and others to develop those goals; and
- identifies a course of action to respond to the assessed needs of the eligible recipient;

REFERRAL AND LINKAGE: Referral and related activities (such as scheduling appointments for the recipient) to help the eligible recipient obtain needed services including:

- activities that help link the recipient with medical, social, and educational providers, or other programs and services that are capable of providing needed services to address identified needs and achieve goals specified in the case plan; and

MONITORING AND COORDINATION: Monitoring and follow-up activities include:

- activities and contacts that are necessary to ensure the case plan is implemented and adequately addresses the eligible recipient’s needs, and which may be with the recipient, family members, service providers, or other entities or recipients and is conducted as frequently as necessary, and including at least one annual monitoring, to determine whether the following conditions are met:
 - services are being furnished in accordance with the recipient’s case plan;
 - services in the case plan are adequate; and
 - changes in the needs or status of the recipient are reflected in the case plan.
 Monitoring and follow-up activities include making necessary adjustments in the case plan and service arrangements with providers.

Eligible Staff: Staff members who have successfully completed an ADMH, OSATS, approved Case Manager Training program and who meet the qualifications of a QSAP I, QSAP II QSAP III, QPP or Certified Recovery Support Specialist (CRSS).

Case Management

Targeted Case Management – SOR3 Only

Definition: A case manager assists a recipient in identifying the recipient's goals, strengths and needs; plans with the recipient what services and community resources might help the recipient to accomplish the recipient's goals; helps refer (and often accompanies) the recipient to obtain services and resources; and then monitors and coordinates the services and resources received to assure that the recipient is getting the help needed to accomplish the recipient's goals and to address the recipient's needs.

These are the four service components to services that case managers provide to their recipients:

- Assessment
- Planning (includes the use of ADMH approved Human Services Needs Assessment)
- Referral and linkage
- Monitoring and coordination.

ASSESSMENT: Comprehensive assessment and periodic reassessment of recipient needs, to determine the need for any medical, educational, social or other services. These assessment activities include:

- taking recipient history;
- identifying the recipient's needs and completing related documentation; and

CASE MANAGEMENT

Targeted Case Management – Medicaid Recipients Only (Target 9)

Definition – Medicaid TCM-9: Case management services are comprehensive services that assist eligible individuals in gaining access to needed medical, social, educational and other services. Targeted Case Management (TCM) services assist specific eligible recipients, or targeted individuals, to access other services.

Target Group 9 consists of Medicaid-eligible individuals who have a diagnosed substance use disorder or substance induced disorder, in accordance with criteria set forth by the most recent edition of the Diagnostic and Statistical Manual of Mental Disorders (DSM) published by the American Psychiatric Association, and who meet the following additional criteria.

- (1) Individuals who:
 - (a) Have been unable to independently maintain a sustained period of recovery after repeated treatment episodes; or
 - (b) Have little or no access to community resources necessary to support sustained recovery efforts; or
 - (c) Have co-morbid conditions, as mental illness, emotional disorders, intellectual disabilities, medical conditions, sensory impairments, or mobility impairments; or
 - (d) Have significant responsibility for the care of dependents, as well as themselves.

Core Services – Medicaid TCM-9:

- Needs assessment
- Case planning
- Service arrangement
- Social support
- Reassessment and follow-up
- Monitoring

NEEDS ASSESSMENT – Medicaid TCM-9:

A TCM provider performs a written comprehensive assessment of the recipient's assets, deficits, and needs. The TCM provider gathers the following information:

- Identifying information
- Socialization and recreational needs
- Training needs for community living
- Vocational needs
- Physical needs

- Medical care concerns
- Social and emotional status
- Housing and physical environment

CASE PLANNING – Medicaid TCM-9:

TCM providers must develop a systematic, recipient-coordinated plan of care that lists the actions required to meet the identified needs of the recipient based on the needs assessment. The plan is developed through a collaborative process involving the recipient, his family or other support system, and the case manager. It must be completed in conjunction with the needs assessment within the first 30 days of contact with the recipient.

SERVICE ARRANGEMENT – Medicaid TCM-9:

Through linkage and advocacy, the case manager coordinates contacts between the recipient and the appropriate person or agency. These contacts may be face to face, phone calls, or electronic communication.

MONITORING – Medicaid TCM-9:

The case manager determines what services have been delivered and whether they adequately meet the needs of the recipient. The plan of care may require adjustments because of monitoring.

SOCIAL SUPPORT – Medicaid TCM-9:

Through interviews with the recipient and significant others, the case manager determines whether the recipient possesses an adequate personal support system. If this personal support system is inadequate or nonexistent, the case manager assists the recipient in expanding or establishing such a network through advocacy and linking the recipient with appropriate persons, support groups, or agencies.

REASSESSMENT AND FOLLOW UP – Medicaid TCM-9:

Through interviews and observations, the case manager evaluates the recipient's progress toward accomplishing the goals listed in the case plan at intervals of six months or less. In addition, the case manager contacts persons or agencies providing services to the recipient and reviews the results of these contacts, together with the changes in the recipient's needs shown in the reassessments and revises the case plan if necessary.

TUBERCULOSIS RISK SCREENING AND INTERVENTION

Definition: Implementation of effective TB prevention and control measures in substance use disorder treatment programs is essential for reduction of TB rates among the general U.S. population and for maintaining the gains made in this area during the past several years. Thus, as part of its TB prevention and control efforts, the Alabama Department of Mental Health is requiring utilization of the Tuberculosis Risk Screening Questionnaire (TRSQ) in each of its contract substance use disorder treatment programs.

Eligible Staff: Each agency shall establish the qualifications of its staff to administer the TRSQ. If nonmedical personnel administer the TRSQ, medical staff consultation shall be readily accessible.

GUEST DOSING PROTOCOLS

OTPS ONLY

Definition: Guest dosing is allowed for patients who need to travel but do not meet the criteria for take home medications. Individuals may also be eligible for guest dosing if the number of days away from the home clinic exceeds their approved number of take homes which have been authorized by the home clinic.

Protocols:

- Requirements of the sending provider agency:
 - Email referral information below to the current ASAIS administrator, Yolanda Ballentine (Yolanda.Ballentine@mh.alabama.gov) and the current ADMH OTP Program manager Debbi Metzger (Debbi.metzger@mh.alabama.gov).
 - The identified contact for the guest dosing/receiving agency (found on the most recent Guest Dosing roster) must also be carbon copied (cc) on the email.
 - Yolanda Ballentine will complete the patient referral process in ASAIS. If Yolanda Ballentine is not available, Debbi Metzger will complete the process. This is not a transfer of the patient. It simply allows the guest dosing agency to see the patient in ASAIS.
 - The email must contain the following information:
 - ASAIS number for person who needs to guest dose
 - Name of receiving agency where the person needs to guest dose
 - Start date for the guest dosing and estimated end date
- Requirements of the receiving provider agency/guest dosing agency:
 - After completion of guest dosing, the receiving agency/guest dosing agency must appropriately discharge the patient through ASAIS.
 - The guest dosing agency must enter a discharge profile, then discharge the enrollment record.
 - Use "Guest Dosing Completed" as discharge reason.
 - This must be completed upon completion of guest dosing for your agency census to be accurate.
- Medicaid recipients MAY NOT be charged for guest dosing, administrative fees, referral fees, transfer fees or any other fees associated with guest dosing.

Location: Certified OTPs only.

PREVENTION

PREVENTION

Definition: A proactive process that empowers recipients and systems to meet the challenges of life events and transitions by creating and reinforcing conditions that promote healthy behaviors and lifestyles. The goal of substance use prevention is the fostering of a climate in which alcohol use is acceptable only for those of legal age and only when the risk of adverse consequences is minimal; prescription and over-the counter drugs are used only for the purposes for which they were intended; other substances that may be abused and not used for their purposes such as aerosols, paint thinners, glue, etc. and other illegal drugs and tobacco are not used at all.

Eligible Staff: See Standards

Reporting Unit: 15 minutes

PREVENTION DEFINITIONS

(50% of the overall prevention budget will be allocated for Environmental strategies)

- 1) Information Dissemination (**H0024**): This strategy involves one-way communication between the source and the audience, with limited contact between the two. This strategy provides information about drug use, and substance use disorders and the effects on individuals, families and communities. It also provides information on available prevention programs and services. Examples of this strategy include: brochures, pamphlets, posters, & flyers; clearinghouse/information resource centers; community resource directories; health fairs and other health promotion; information lines/hot lines; information through websites; information-based media campaign; media campaigns; newspaper and newsletter articles; radio and television public service announcements; and speaking engagements. This strategy may be used in conjunction with other strategies, practices and policies to have efficacy in communities.

Contract Billing Rate: \$12.75 per 15-minute unit¹

- 2) Environmental Approaches (**H0025**): This strategy seeks to establish or change community standards, codes and attitudes, thereby influencing the substance use in the general population. Examples of this strategy include: changing norms or attitudes about ATOD; changing public perceptions and norms about youth and their capabilities; changing school norms and attitudes to increase a positive school climate; media strategies to assure balanced responsible reporting about you; vendor education or business practices that promote health; promoting the establishments or review of alcohol, tobacco and drug use policies in schools; guidance and technical assistance on monitoring enforcement

¹ All rates include costs for salaries & benefits. Rates do not include travel, operating expense/admin and equipment, which will continue to be a separate line item.

governing availability and distribution of alcohol, tobacco and other drugs; modifying alcohol and tobacco advertising practices; and product pricing strategies. This strategy may be used in conjunction with other strategies, practices and policies to have efficacy in communities.

Environmental strategies focus on the cause and the conditions of the community environment that are:

- Changing economic conditions (How much things cost; how available things are);
- Changing social conditions (What people think; how people live);
- Changing media conditions (What people read, watch, hear, and see); and
- Changing political conditions (Who has power; who has influence)

Environmental strategies also focus on changing the norms and regulations that influence/control the social and physical contexts of the use of alcohol, tobacco and other drugs.

Environmental strategies cannot be solely used for meetings, information dissemination or community awareness campaigns.

Contract Billing Rate: \$21.39 per 15-minute unit

- 3) **Community-Based Processes (H0026):** This strategy aims to enhance the ability of the community to provide more effective prevention and treatment services for substance use disorders by including activities such as organizing, planning, interagency collaboration, coalition building and networking. Effective organizing and planning are paramount to the success of prevention practices, policies and programs. Examples of this strategy include: efforts to decrease barriers to services; youth-adult partnerships addressing community issues; needs assessments & community readiness surveys; community and volunteer training; cross-systems planning; multi-agency coordination and collaboration/coalition; community team building activities; accessing services and funding; and coalitions, collaborations and/or wellness teams. This strategy may be used in conjunction with other strategies, practices and policies to have efficacy in communities. This strategy cannot be solely used for meetings, information dissemination or community awareness campaigns.

Contract Billing Rate: \$13.75 per 15-minute unit

- 4) **Education (H0027):** This strategy involves two-way communication and is distinguished from merely disseminating information by the fact that it is based on an interaction between the educator and the participants. Activities under this strategy aim to affect critical life and social skills, including decision making, refusal, and critical analysis skills. Examples of this strategy include: community service activities; interactive technologies; community and volunteer workshops; parenting and family management classes; ongoing classroom and/or small group sessions; peer leader/peer helper programs; education programs for youth groups; children of substance users groups; and life skills. This strategy may be used in conjunction with other strategies, practices and policies to have efficacy in communities.

Contract Billing Rate:

\$3.50 per 15-minute unit H0027
stand-alone program (1 domain, 1 location)

\$12.75 per 15-minute unit H0027:HF
2 or more strategies in different domains with the same target
population during business hours (8am-3pm Monday-Friday).

\$21.39 per 15-minute unit H0027: HF:HA
2 or more strategies in different domains with the same target
population after business hours, weekends, summer and spring
breaks.

- 5) Problem Identification and Referral (**H0028**): This strategy aims to identify those who have indulged in the use of illicit drugs or underage use of tobacco and alcohol in order to determine whether their behavior can be reversed through education. This strategy does not include any activity designed to determine whether a recipient is in need of treatment. Examples of this strategy include: alcohol information schools; crisis lines or hotlines; depression and mental health screening programs; driving while intoxicated education programs; driving while under the influence/while intoxicated programs; Employee Assistance Programs; nicotine use and addiction screening; Student Assistance Programs; and support groups, talking/healing circles. This strategy may be used in conjunction with other strategies, practices and policies to have efficacy in communities.

Contract Billing Rate:

\$15.00 per 15-minute unit

- 6) Alternatives (**H0029**): Evidence does not support the use of an alternative strategy as a sole prevention strategy with the intended target population. Alternatives can and should be used as a part of a comprehensive plan to make lives richer and healthier. The goal of this strategy is to have target populations participate in activities that are alcohol, tobacco, and other drug free in nature and incorporate educational messages. Examples of this strategy include: community service activities; culturally-based activities; drug free dances and parties; intergenerational events and celebrations; job shadowing, internships, work place experiences; leadership activities; mentoring programs; Outward Bound; recognition events that celebrate recipient or group accomplishments; social & recreation activities; youth centers & community drop-in centers. This strategy may be used in conjunction with other strategies, practices and policies to have efficacy in communities.

Contract Billing Rate:

\$3.50 per 15-minute unit H0029
stand-alone program (1 domain, 1 location)

\$12.75 per 15-minute unit H0029:HF
2 or more strategies in different domains with the same target
population during business hours (8am-3pm Monday-Friday).

\$21.38 per 15-minute unit H0029: HF:HA

2 or more strategies in different domains with the same target population after business hours, weekends, summer and spring breaks

An approved Plan must be on file prior to the implementation and reimbursement of strategies. Documentation of strategies must be facilitated on an ongoing basis and data entered in the information management system (ASAIS). Supporting documentation must be maintained by the provider of services in accordance with the guidelines within the Prevention Standards.

Changes made to this Billing Manual: No changes since April 1, 2023 however, updates will be made before October 1, 2023.
